Davi Azevedo

Full-stack Software Engineer at LuxuryEscapes
Florianópolis, Santa Catarina, Brazil

Summary

I'm a Full Stack developer with a passion for creating and understanding systems.

As Tech Lead I'm always challenging my team, trying to improve their teamwork, code skills, and a general understanding of the project specs.

With solid experience with enterprise systems, I've created and improved control systems, dashboards, and some client products.

My best stack at the moment consists of .Net core, React Js, React Native, and Node.Js.

Experience

Luxury Escapes

Full Stack Software Engineer

May 2023 - Present (3 years 1 month)

Florianópolis, Santa Catarina, Brasil

At Luxury Escapes we are proud to deliver great experiences wherever you go as a software engineer my job is to ensure ours services and 3° party integrations work at best. Delivering meaningful features every sprint, I am in full collaboration with my team and Product Manager, helping with insights about the product.

In my work days I'm constantly dealing with microservices, jobs and queues with redis, database scripts and migrations, a LOT of unit, e2e and integration tests.

Even though my front-end skills are not the best, I try to improve it by doing some tasks and helping my coworkers

Porter Group

Full-stack Developer

August 2021 - March 2023 (1 year 8 months)

Florianópolis, Santa Catarina, Brazil

Durante minha jornada na PorterGroup, trabalhei com os diferentes produtos da empresa, desenvolvendo soluções WEB, mobile, integrações com dispositivos próprios e terceiros através de SDKs, escalando aplicações na

cloud, e trabalhando para melhorar as experiências de desenvolvimento pessoais e da equipe de desenvolvimento

HAVAN

Technical Lead Developer

October 2020 - August 2021 (11 months)

Brusque, Santa Catarina, Brasil

I've started this job as a junior developer, working on improvements and new features on internal systems.

As the time passed, my constant evolution let me to conquer a Tech Lead role, and gave me the challenge of leading a team to remake and improve an old product.

FATEC Ourinhos Faculdade de Tecnologia de Ourinhos

Software Engineer

March 2020 - October 2020 (8 months)

Ourinhos, São Paulo, Brasil

A college project, to build an app to improve the Zona Azul in the city.

The Zona Azul is an area in the center of the city where the parking spots are controlled, paying per hour.

The app was centered on Every day users, keeping in mind the simplicity of the interface and general usage.
