Experience

Full Stack Software Engineer, Luxury Escapes May 2023 – Present

- **New Product Launch:** Led the backend integration of a major Car Hire provider, successfully launching a new business vertical for the company.
- **B2B2C Expansion:** Architected and developed a high-growth "Agent Platform", enabling travel agents to purchase inventory directly. The product has achieved rapid market expansion and strong sales performance.
- Engineered features for commissions, invoicing, and reservations within a distributed microservices architecture.
- Integrated complex 3rd-party APIs while ensuring reliability, fault tolerance, and high performance.
- Developed internal tooling to improve developer efficiency and actively contributed to project definitions, prototyping, and documentation.
- **Stack:** Node.js, TypeScript, React.js, PostgreSQL, Redis, AWS, Heroku, New Relic.

Full Stack Software Engineer, Porter Group Aug 2021 – Mar 2023

- **High-Scale Architecture:** Scaled backend solutions to support **thousands of condominiums and over 100,000 IoT devices** across Brazil.
- Engineered a new service for high-volume data ingestion from 3rd-party devices using SDKs and event-based workflows.
- Ensured high availability and real-time responsiveness for critical security and monitoring systems.
- Improved Development Experience (DevEx) by optimizing team tools and refactoring legacy mobile application backends.
- **Stack:** C#, .NET Core, React.js, PostgreSQL, MongoDB, Redis, AWS (SQS).

Technical Lead Developer, HAVAN Oct 2020 – Aug 2021

- Promoted to Tech Lead to guide a squad in the complete modernization and redesign of a legacy product, focusing on UI/UX and architectural improvements.
- Maintained and enhanced critical internal software including CRM, purchase processing, and document emission services.
- Managed notification systems and user interfaces for both customers and employees.
- **Stack:** .NET Core, C#, Angular, Vue.js, SQL Server, Redis.

Software Engineer - Internship, FATEC Mar 2020 – Oct 2020

- Developed a "Zona Azul" mobile application (React Native) and backend server to digitize city rotational parking.
- Implemented ticket purchasing, user registration, and payment gateways, eliminating the need for physical vendors.

Skills & Languages

Core Technologies: React.js, Node.js, TypeScript, C# (.NET Core), Microservices, REST APIs, SDK Design.

Infrastructure & Database: AWS, Heroku, Redis, PostgreSQL, MongoDB, SQL Server, Docker, Event-Driven Architecture.

Tools & Quality: Sentry, New Relic, CI/CD, Unit/E2E Testing, Agile Methodologies.

Languages: Portuguese (Native), English (C1 - IELTS Overall 8.0).

Education

Centro Universitário de Brusque (UNIFEBE), Undergraduate Studies in Information Systems 2021 – 2023

Universidade Tecnológica Federal do Paraná (UTFPR), Undergraduate Studies in Software Engineering 2018 – 2019
